

NOTICE OF LEAD SERVICE LINE REPLACEMENT

This notice is to advise you that the investigation and/or replacement of your water service line will commence within the next **14 days**. Through the State of Michigan Department of Environment, Great Lakes, and Energy (EGLE), the Village has contracted with Gustafson HDD to investigate the material of your existing water service line and, if it is found to not meet EGLE's Lead and Copper Rule, will be replaced at **NO COST** to you from the water main up to 18" inside your house. Gustafson HDD or the Village will ask to access your home to where your water service enters your home to either verify the existing compliance with the Lead and Copper Rule, or to complete the water service replacement. During this time, you may experience minimal interruption of water service. Grass or pavement disturbances in front of your residence will be replaced as a part of this project. Thank you for your cooperation during this project. If you have any questions, please call any of the follow contacts. To schedule your **FREE** in-home water service investigation and/or replacement, please call Brandon Andree from Gustafson HDD:

VILLAGE:
